

Point Services Corporation
Sewer System Discussion Update #1
30 December 2004

Hello

On the 27th of September this year, the PSC Board met to discuss several routine matters concerning our Point, and one matter that was not routine. Sewer. This matter has been on the periphery of concern for most of us for more than a year, occasionally coming up in other board meetings as well as joint meetings with the Romain, Sheaver's Creek, and the Woods Bay Divisions. During the meeting on the 27th the Board ask me to head up the future work on the matter of a sewer system for our area. I accepted. The Sewer Committee at the present time consists of one.

Attached is a notice of Public Meeting to be held on 11 January 2005. It contains a synopsis of work that has been conducted so far on the currently formed and organized water and sewer districts, and a brief discussion of the way ahead.

I am compiling information regarding the work that has been done thus far regarding the Sheaver's Creek and Woods Bay Water and Sewer district and plan to issue periodic, though not frequent, updates such as this one. The volume of information is large and there is a lot that I will not be able to do without additional insights, questions, complaints, comments, and / or suggestions.

Many of you will not be able to attend this public meeting. Please send any input you feel you would like to have aired during this meeting to me using one of my email addresses. Some of you may have already received this notice of public meeting and will attend. For others, I encourage you to send to me your comments whether by mail or email. If your comments by mail do not reach me in time for the meeting I will incorporate them into follow-on meetings and information gathering activities. My email addresses are listed below.

Sincerely,

Paul J. Rana
PSC Sewer Committee
